Safety Posters Brochure

SEED – About Us

Safety Environment Education for Development - SEED is started to improve the safety, health and environment among industries, construction sites and for general public. Our aim is to prevent death, injury and illness by educating safety to all.

To achieve the above target, we issue safety pamphlets, safety banners on important days on free of cost to the industries and we also support the families of industrially injured people financially and morally. We also conduct free safety training programs in medium based industries, small construction companies' schools, ITI's, colleges and other educational institutions to spread the safety awareness.

SEED is determined to carry the values and standards of safety as it grows.

SEED is known as a "can do" organization, available 24 hrs a day, 7 days a week to respond to all your safety needs, from initial workforce training till field safety solutions.

Safety Posters

Colorful safety posters remind and help teach employees about safety rules and procedures.

These posters are perfect for your office, factory, warehouse, construction site, manufacturing

facility, building, or other workplace. Safety posters are well designed in GSM boards and flex to display in your factory premises
